

Start your calves out right with First Day Formula!

FIRST DAY Formula®

- Contains 150 grams of bovine globulin protein per package
- Made from high quality first and second milking bovine colostrum from selected Grade A dairies
- Guaranteed free of organisms that cause major colostrum-transmissible diseases, including John's
- Has instructions for use as a replacement or supplement for maternal colostrum
- Increased globulin protein intake has been shown to improve passive transfer of immunity to the newborn calf
- Provides assurance that diseases won't be passed from cow to calf, an important step in maintaining biosecurity
- Mixes easier than other replacement products, making it more convenient to feed
- Dual replacer/supplement directions are suitable for dairy and beef cow-calf operations

As a colostrum replacement:

Feed 1 packet to provide 150 grams of bovine globulin protein.

As a supplement to colostrum:

Feed 1/2 packet to provide 75 grams of bovine globulin protein.

30240 500 grams
