

# ACCEL MXL-600

A COMBINATION OF BENEFICIAL MICRONUTRIENTS

*Designed to assist animal performance during feed quality challenges.*

## WHY USE ACCEL MXL-600?

Accel MXL-600 is a combination of beneficial micronutrients designed to assist animal performance in the presence of out-of-condition or moldy feeds.

## USAGE GUIDE

- Each 50 pound bag of Accel MXL-600 contains 600 feedings.
- Feed one pound per 12 head daily.
- MXL-600 can be mixed into grain mixes or TMR feeding programs.

## COMPANION PRODUCTS

Tri-Mic 1:50, Tri-Start, Accelerated Fortifier 1:50.

Using these products along with MXL 600 can help improve animal performance when the immune system is challenged due to stress and/or out of condition feedstuffs.

## KNOW THE SIGNS OF MOLDY FEEDS

1. Reduced feed intakes or excessive sorting of feeds.
2. Caking of feed in storage units along with multiple colors growing on feed, feed bunk, etc. (pink, green, orange, black, white).
3. Cows eating dirt.
4. Open heifers with swollen udders.
5. Low disease resistance (cows taking a long time for recovery or antibiotics not getting favorable response).
6. Poor reproduction efficiency (Too many cows are repeat breeders even after showing good heats).

## TESTIMONIAL

Rex Bell of Statesville, NC, began using Accel MXL-600 on his 195-cow Holstein herd because he was experiencing some reproductive problems and thought it could be related to a possible mold issue.

After using the product, Rex noticed improvements. "Accel MXL-600 turned the breeding problems around and the issues I was having with early embryonic death loss," Rex stated. "When I started using MXL-600, I also noticed a positive change in the cows' manure and their fat tests went up too. Overall, the herd health is much better. Right now my herd is in the best reproductive shape it has ever been going into the summer which is typically a more difficult time to breed cows because of the heat."
